LESS THAN FOUR PER CENT. IN POOR HEALTH

Report of Dr. James Hugar on the health of the pupils at the Edmonton public schools.

In appointing a medical inspector last week to watch over the health of the children in attendance at the Edmonton public schools, the school board acted on the advice given by James Hugar in a carefully prepared report. Dr. Hugar acted as chairman for the board in the capacity of medical inspector during the last school year. In that time he made an inspection of the pupils in the Public and High Schools, in all 2,108 children being examined. The general health of the pupils was reported as being very good. Less than four per cent. were found to be in really bad health.

Dr. Hugar outlines the scope of medical inspection by the state, and the methods by which the desired results may be attained. He urges the co-operation of teachers with the medical inspector in their duties, thus leaving the medical officer more time for the thorough examination of the pupils. He also points out the existence of infectious diseases in the schools, and the importance of measures to avoid the spread of such diseases. Attention is drawn to the need of proper hygienic arrangements in the schools, such as the lighting and ventilation of rooms, material and methods of cleaning.

In the case of the very poor, who are unable to provide for their own maintenance, Dr. Hugar suggests that free treatment be afforded by the inspector. The payment for this treatment be made by the school board, and the amount of the payment be determined on the basis of the family income.

Dr. Hugar reports that there are powerful arguments why the medical inspector should not be engaged in private practice, as well as in the hospital. He also points out the importance of the board, Dr. Hugar asserts that, in his opinion, the most thorough results may be obtained on the other side. With experience an inspector might recognize diseases, but would not find it necessary to send his pupils to the hospital.

Dr. Hugar's report in full is as follows: The Edmonton Public School Board. Gentlemen,—Pursuant to your resolution of the 14th inst., I have the honor to report to you the results of the examination of the pupils in the Public and High Schools, in all 2,108 children being examined. The general health of the pupils was reported as being very good. Less than four per cent. were found to be in really bad health.

The following list comprises the defective conditions noted and the number of those affected in each class. Defects of eyes, . . . 72 3.4 Defects of ears, . . . 22 1.1 Defects of nose, . . . 22 1.1 Defects of throat, . . . 22 1.1 Defects of skin, . . . 22 1.1 Defects of teeth, . . . 22 1.1 Defects of hair, . . . 22 1.1

SPREAD OF THE DISEASE IN THE SCHOOLS

The two chief duties which devolve upon the state, in so far as the medical inspection of the pupils is concerned, are (1) to secure for the pupils the best possible medical attention, and (2) to prevent the spread of the disease in the schools.

The first of these duties is to secure for the pupils the best possible medical attention. This is to be accomplished by the medical inspector, who is to be appointed by the school board. The second duty is to prevent the spread of the disease in the schools. This is to be accomplished by the medical inspector, who is to be appointed by the school board.

BAPTISTS ACCEPT THE ADVANCED TEACHING

Higher Criticism Not Dangerous When Properly Understood—Eastern Convention Resolves to Accept the Teaching of the Bible as It Really Was.

Toronto, Oct. 26.—After a debate lasting until well past midnight yesterday, the Baptist convention of Ontario and Quebec adopted a resolution endorsing the teaching of the Bible as it really was. The resolution was adopted by a vote of 100 to 10. The convention was held at the Hotel McArthur in Toronto.

NEW MINISTER TELLS PLANS FOR THE FUTURE

Appointed at the Corruption of the Old Regime in Lisbon—Taxes on Necessities Will Be Devalued and on Luxuries Increased.

Lisbon, Portugal, Oct. 26.—Jose Bello, minister of finance, in an interview today declared that he was appointed at the corruption of the old regime in Lisbon, which he considered as a revolution. He said that he would be to the king against such a revolution, which he estimated at five hundred thousand dollars. The minister added, would be replaced by a moderate presidential officer. Taxes on necessities would be reduced and on luxuries increased.

The minister added, would be replaced by a moderate presidential officer. Taxes on necessities would be reduced and on luxuries increased. The minister added, would be replaced by a moderate presidential officer. Taxes on necessities would be reduced and on luxuries increased.

A Strong Point of Superiority

In a McClary's Sask-Alta Steel Range is the easy working lift top and broiler opening, adjusted easily by a simple pull at an Alaska coil handle. See the generous opening for receiving your broiler or toaster—or for replenishing fuel. Better, all smoke and odors are carried into the chimney and out of the kitchen. The same lever works so the top remains down, leaving an oblong opening at the front end when desired. A

has every improvement that a first class range could have. It is constructed on practical ideas down to the last little bolt. It is made for service and it gives it now to thousands of users who are more than satisfied. The nearest McClary agent will show you only, and convince you that it combines economy in long life and reduced gas bills. Address the nearest McClary branch for Sask-Alta booklet.

PRINCE RUPERT BADLY DAMAGED BY STORM

The Telegraph Lines Are Down. Bridges Have Been Washed Out. The Storm Has Done Much Damage to the Town.

Vancouver, B.C., Oct. 26.—(Pierce and destructive storm on the coast of British Columbia and Alaska, according to advice from Prince Rupert. Strong winds and heavy rains are being felt in the vicinity of the terminus of the Grand Trunk Pacific. Bridges are being swept away and telegraph and telephone lines are being torn down by wind and landfalls. So far as has been heard no lives have been lost.

The storm has continued since last Wednesday, and the damage done by it has been terrific, particularly in the vicinity of Prince Rupert. Last Wednesday the Kootenai bridge, one of the biggest on the Grand Trunk Pacific Railway, near Prince Rupert, was blown down, and the track washed out for about two miles. The telegraph line of the government along the Kootenai river suffered a great deal, a mile of poles and wire being taken away by a landslide. The cables and efforts in this particular locality had a foot of water on the floor.

The highest tide of the year occurred on that day, and the water rose to within a few feet of the Prince Rupert wharf. As the result of the storm Prince Rupert, which is a town of about 10,000 people, was devastated for miles, boats and houses being carried away, wrecked and battered about.

The telegraph and telephone lines are now trying to cope with the situation as best they can under very trying circumstances. The crews of the Grand Trunk Pacific are also at work trying to repair the damage done. The railroad line was the particular prey for the storm, the heaviest damage not being started. In a number of places work trains were completely wrecked.

Prince Rupert at last reports was out of communication with the rest of the world by reason of the wreckage of the telegraph and telephone lines. The telegraph and telephone lines were the particular prey for the storm, the heaviest damage not being started. In a number of places work trains were completely wrecked.

WATCH AEROPLANES BY GLOW OF STARS

Flying Machine Seen in Sky at Aviation Field After Night Storm. Highest Altitude Reached During Day Was 5,500 Feet—Heavy Winds.

New York, Oct. 26.—(Pierce) When it came to the Aviation Field at night, the sky was filled with stars. The highest altitude reached during the day was 5,500 feet. Heavy winds were blowing, and the flying machine was seen in the sky.

There was no moon and it was by the almost imperceptible glow of stars that these two, Hovey and Johnston, watched the flying machine.

Johnston, a Canadian, estimated five thousand, seven hundred and sixty feet and Hovey's six thousand one hundred and seventy-three feet.

Four aviators started in the cross-country race to a point about 100 miles out of the course and returned. The flying machine was seen in the sky at night.

Following are the aviation summaries: Special hourly distance event, won by Latham (Antinette), seventeen laps, time 52.22.5. Second, Wright (Wright) sixteen laps, time 57.2.2. Third, Wright (Wright), sixteen laps, time 57.2.2.

LOST BALLOONISTS AT LAST HEARD FROM

Alan H. Hawley and August Post Left by Word of Their Safe Landing. A Week Ago—Night in the Wilderness—240 Miles North of Quebec.

New York, Oct. 26.—(Pierce) Alan H. Hawley and August Post, who were the able in the balloon, Dandelion, received a telegram tonight from Alan H. Hawley and August Post, telling of the safe landing of their balloon America II, and of their personal safety. The message, which was dated from St. Anthony, Quebec, is as follows:

"Landed Fort-Union River, north Lake Umbagog, N.B. All well. The 12th was a week ago today. Quebec, Oct. 26.—Word was received here tonight from St. Anthony, New Brunswick, that the balloon America II, landed near Fort-Union, New Brunswick, twenty-five miles from St. Anthony, on the 12th. Hawley and Post descended at the junction of the White and Harlow rivers and left for Chelmsford, two hundred and twenty miles north of Quebec, for train connection with the Quebec and Lake St. John Railway."

Quoted Oct. 26.—(Pierce)—Never was received from Chelmsford tonight of the arrival there of Hawley and Post, who after an extremely thrilling experience in the woods were able to reach civilization again. They reached Chelmsford at ten o'clock at night and after proceeding to the Chelmsford station had a wash and something to eat, after which they went to bed.

The balloonists stated they had been forty-eight hours in their balloon, and had covered one thousand, four hundred and sixty miles. They landed at three o'clock in the afternoon at Lake Umbagog, which empties into the Peribonze. After three days and nights they plodded through the woods, sleeping in the open and short of provisions. They were rescued by a hunter's camp. Their record is the best yet, beating out the Dandelion by more than a hundred miles.

Their record is the best yet, beating out the Dandelion by more than a hundred miles. They were rescued by a hunter's camp. Their record is the best yet, beating out the Dandelion by more than a hundred miles.

GRAND RAPIDS MAY BE DISAPPOINTMENT

Engineer's Report Shows That the City Will Not Be Served by the Grand Rapids Water Works.

That in some ways it was pleased and in some ways disappointed by what he had seen at Grand Rapids, was the second approach to a definite statement that could be obtained from John A. Fielding, C.E., last evening when his return from Grand Rapids, where during the past six weeks he has been engaged making investigations on behalf of the city of Edmonton with a view to the establishment of a hydro-electric plant at that point on the Athabasca river.

Questioned concerning the meaning of this statement and the results of his investigations which had given cause either for pleasure or disappointment, Mr. Fielding refused to make any mere definite statement. His words would seem to indicate that the sanguine expectations which have been generally entertained in the city might possibly be qualified by the report which he will submit before the end of the present year.

Pleased for further information as to the impression he had received from what he had seen at Grand Rapids, Mr. Fielding merely remarked: "There is undoubtedly a great flow of water."

"Do you think it will be found possible to utilize it for the development of power for use in the city of Edmonton?" he was asked.

"I am not in a position to say at the present time," he replied smiling. "It is quite impossible for me to make any statement until I have attended to the expedition, which is the study of the data which I have been able to collect during the past six weeks. I leave tomorrow evening or on Friday morning for Toronto, where I shall be engaged for some time in the preparation of the report on this expedition, which by my agreement with the city will be submitted before the end of the year. There is a great deal of work to be done and it is likely that the report will be submitted before the year is out."

Grand Rapids is situated at a point on the Athabasca 165 miles from the mouth of the river. It is a swift water in a Pelican Rapids. Fielding made the return journey to the Landing in one and a half days.
